

ENTRY LEVEL ENGINEER NEEDED

Design & Integration is a growing audiovisual contracting company located in Baltimore. We specialize in high-end commercial A/V system sales and installations. We provide employees with exciting career opportunities that are only limited by their own capabilities and skills. Everyone is given the opportunity to succeed. Currently we are seeking a motivated Entry Level Engineer with a bachelor's degree related to audio and video to join our winning team.

This is an ideal position for recent graduates. The selected candidate will have the chance to work along side of our Head Engineer and President. Responsibilities include the creation of CAD shop drawings and testing A/V systems, while also gaining the experience of preparing proposals and system designs. Opportunities for advancement include project engineering, project management, and system programming.

RESPONSIBILITIES:

- Putting together proposals based on consultant drawings
- New system Design
- Auto CAD Drafting
- Testing of completed systems
- Client Training
- System Troubleshooting

DI offers fully covered benefits including health, vision, dental and a generous retirement plan. Qualified candidates interested in joining a challenging, growth-oriented organization are encouraged to email or fax their cover letter and resume.
